

COMMENTS

The FIT would like to make the following additional comments concerning the site.

1. Despite the presence of potentially hazardous materials and the possibility of contaminated groundwater, the site fails to score due to the low population number of persons drinking groundwater. The majority of cities within a 3 mile radius are on surface water from Lake Michigan. The ^{sw} intakes are outside the 3 mile radius. The city of Bellwood, which is within the 3 mile radius, utilizes water from a confined aquifer

EPA Region 5 Records Ctr.

TABLE 2 FOOTNOTES

- (1) The numbers presented in this column are the Chemical Abstracts Service (CAS) numbers used for cataloging the indicated compounds in the Chemical Abstracts Index.
- (2) $\mu\text{g/l}$ = micrograms per liter or parts per billion.
- (3) The indicated compound is incorrectly identified in Part C of NPDES Form 2C as 1,2-Dichloropropylene. However, the sample was screened for the presence of both compounds.
